Embrace all the latest features and technologies – including calls, SMS, plus incredible contractless wireless plans on prepaid Alcatel smartphones. Reviews, Promotions, and Mobile Phone Deals from Verizon, FreedomPop, Net 10, Simple Mobile, Sprint, Straight Talk, Tello, TracFone, Q Link. Big smartphones with warmer brands with low monthly prices available. Promotions, promo codes and offersWhat we loveAffordably price4G internetCompact DeviceOverviewAlcatel OneTouch Pixi Pulsar A460G is a 4-inch smartphone that comes with Android 4.4 KitKat. It has a dual-core processor and loads of other features of medium beautiful. Also, it is worth noting, it is a GSM phone and works with AT & cellular towers; T so be sure to check that you AT & T network coverage in your home area. One thing that impressed me about this entry level phone is the 4G capacity. UnboxingAlcatel OneTouch Pixi Pulsar A460G is a prepaid GSM phone that you can order from Straight Talk. Opening the box, we have the Alcatel gadget, battery, a wall adapter, a standard USB cable, battery, a pair of headphones, service manuals and activation card. Installing the battery and doing the initial configurations is quite simple, I was done in less than 5 minutes. I'm going straight to the project. DesignAlcatel OneTouch Pixi Pulsar A460G is a 4-inch device with slightly rounded corners. The outer cover is made of plastic with a beautiful texture. The back cover is removable - allowing access to the battery and also to microSD and SIM slots. The external design and layout of the buttons is typical. The power button and headphone jack are located on the top frame of the device. The volume buttons are located on the right side of the device. We have the USB port on the underside of the gadget along with the microphone. The back cover contains the main camera and main speaker. Arriving in front, you'll find the 4-inch capacitive display. The bottom of the screen contains the navigation buttons. The phone has the three navigation buttons: the Back left button, the Home button in the center, and the recent apps button on the right. The phone is very compact and fits perfectly in one hand. CameraAlcatel OneTouch Pixi Pulsar A460G is equipped with a 2MP rear camera and of a front camera. It takes quite average photos in well-lit environments, but would have poor performance in dark areas due to the lack of an LED flash on the rear camera. It can capture videos, and it has some filters that you can apply to photos taken. DisplayAlcatel OneTouch Pixi Pulsar A460G offers a compact 4-inch display with average resolution. It's not so small that you won't see it and not so big that you'll have to struggle to operate with one hand. The screen is relatively touch responsive, and I think it's a good device for the price. BatteryBattery's capacity on the Alcatel OneTouch Pixi Pulsar A460G is 1400mAh. Since it is a compact device, the battery life is average. 7 hours of conversation time and 9 days of standby is good enough for a phone in its price range. When playing and intensive navigation, I had to recharge a few hours throughout the day. But with typical use such as texting, making calls, or answering emails the battery survived through a day. Storage Alcatel OneTouch Pixi PulsarA460G comes with 4GB of internal storage, although usable memory is 2GB. Now, that may seem small, but it contains some applications. If the internal memory runs out, you can expand the capacity with an external microSD card up to 32 GB. PerformanceAlcatel OneTouch Pixi Pulsar A460G ships running Android 4.4 KitKat. It is powered by a Qualcomm Snapdragon dual-core processor running at 1.3 GHz. On board the device is 512MB of RAM. I found the performance of the phone to be average in activities such as browsing, watching videos on YouTube and playing games. It is 4G enabled, so loading pages and other internet activities is quite fast. While browsing, the phone works well with some tabs open; can become slow if you open as more than five tabs. It's an excellent phone for texting, checking emails, and making calls though. Messages have a conversation-like view that is quite impressive for a low-end phone. It comes with all the essential applications you may need to operate like Gmail, Google Maps, Hangouts, Google Photos, and more. It has Bluetooth 4.0 for quick file transfer between neighboring devices. GPS is also available for location services and navigation on Google Maps. It has Wi-Fi, FM radio and compatibility with hearing aids. Specifications4G/Wi-Fi/GSM 4 inch completely touch screen 2MP rear camera. Battery capacity: 1400mAh. Talk for up to 7 hours. Waiting time of up to 9 days. Internal memory 4GB. Supports microSD cards up to 32GB 512MB of RAM. 4.79"(H) x 2.54"(W) x 0.47"(D) inchesBluetooth 4.0 Wireless Technology 1.3 GHz Dual-Core Processor.GPS Capable.Hearing Aid Compatible.
